

very powerful Output

powerful 9 kW

compact

**Made in Germany** 

At the moment, the **ORKA** is the most powerful fog generator available on the market that is produced as a serial product. It can be used wherever a high quantity of fog is needed in a very short time.

Due to its enormous power and the strong output very large halls and even stadiums can be filled with fog.

The **ORKA** is the perfect machine for Events, Concerts, Special effects, Theme parks, large TVand Film-Studios and for Fire brigades or Desaster control examinations.

The compact dimensions and the robust housing of the machine make it suitable for touring use.

#### **Features**

# Control panel

The control panel with LED-display, simple symbols allow for easy operation. It also protects the control buttons against dirt.

• Finest adjustments of the output Digital technology makes fine adjustment of the pump possible. In steps of 1% the output can be adjusted from 0 - 99%. Thus, any desired effect from a tiny fog-cloud to the thickest fog can be produced. This enables the **ORKA** to be used in both small and large locations.

#### • DMX 512 as standard

The **ORKA** can be controlled via *DMX 512*. The connection is done with 5pin-XLR-plugs.

The DMX start address can be adjusted and saved via the control panel.

If an external fan is connected to the machine it can be controlled separately via DMX as well and can be used as a wind machine.

The machine can also be controlled with *analog* (0 - 10 V) via a lighting desk or via XLR-remote (option). This connection is done with 3pin-XLR-plugs.

A stand-alone-mode is also possible. The adjustments are done directly at the machine. A short press at the start button makes the machine run. Therefore a permanent pressing of the start button is unnecessary.

# • Internal timer

With the internal timer the fog time can be exactly adjusted in seconds, the wait time in minutes and the output in %.

• Connector for external fan An external fan with max. 800 watts can be connected to the **ORKA**.

### Fluid

The following Look-fog fluids are available for the **ORKA**:

- · Quick-Fog (thick, quick disappearing fluid)
- · Regular-Fog (thick, long lasting fluid)
- · Slow-Fog (thick, extremly long lasting fluid)

# **Technical data**

Procedure	vaporizing fog machine
Power requirement	9000 Watt
Voltage	3x230 V with neutral 50 Hz
Warm up time	approx. 15 min.
Fluid consumption at 100% output	500 ml/min.
Fog output	adjustable in 99 steps
Output projection	approx. 30 m/32.80 yd
Fogging time at 100% output at < 40% output	2.5 min. continuous output
external Fan	max. 800 Watt integriated capacitor
Air quantity	adjustable in 99 steps
Control	
	DMX 512 0 – 10 V analog Stand alone Radio remote (option)
Temperature control	0 – 10 V analog Stand alone
Temperature control  Overheating protection	0 – 10 V analog Stand alone Radio remote (option)
·	0 – 10 V analog Stand alone Radio remote (option)  Microprocessor two thermocouples  Heater block/Thermostat

# **Advantages**

- DMX as standard, analog and stand-alone-Mode
- Internal timer
- Easy handling
- Very powerful output
- Fogging output adjustable in steps of 1% from 0 99%
- Continuous output
- Connector for external fan with max. 800 Watt
- Made in Germany

#### **Accessories**

- XLR-Remote
- Radio remote
- LookFan, 355 Watt

# Service

Based on the strong partnership with the German manufacturer OTTEC Technology GmbH, Look Solutions is able to provide a quick and easy service which guarantees the high quality of all products with the motto "innovation by communication".
