REPACK 610

REPACK 616

## REPACK 610 & 616

The REPACK is a useful tool for switching on and off non-dimmable devices such as flame effects, mirror balls, lighting fixtures with discharge lamps, black-light effects, moon flower effects etc. The Relay Pack is DMX-512 controlled and on the front panel there are six MCBs, mains switch, LED monitors and manual ON/OFF with six push buttons. It is supplied with one CEE 5X32A plug and socket for power supply. The unit features zero crossing switch-on and programmable switch-over level. The 3-digit numeric display shows the start address which can be selected from the corresponding buttons.

Also available with WIELAND and SOCAPEX outlets.
